LUMINOUS
COLOR TUNING
LED PANELS

FEATURES
- Tune color temperature between 3000K and 5000K using wireless remote and/or wall switch
- Battery operated 2.4GHz remote and wall switch have a range up to 100 ft
- Remote can control up to 4 groups of fixtures with unlimited number of lights per group, and save CCT setting
- Continuous dimming is also available through standard 0-10v dimmers or with remote and wall switch
- White Aluminum Frame with Frosted Lens
- Slim Profile for Shallow Ceilings
- Efficiencies of up to 114 lm/W
- 120° Beam Angle
- Standard 0-10V Dimming
- Standard Earthquake Proof Hooks
- Rated for IC Installations
- Surface mount kits and hanging kits available
- Suitable for use in Damp Locations

APPLICATIONS
Offices, Retail Stores, Healthcare, Hospitality, Education

* L90 & L70 values at 25° C are calculated per TM-21 based on LM-80 and in-situ luminaires testing. In accordance with IESNA TM-21-11, projected values represent interpolated value based on time durations that are within six times (6x) the IESNA LM-80-08 total test duration (in hours) for the device under testing (DUT) i.e. the packaged LED chips. In accordance with IESNA TM-21-11, calculated values represent time durations that exceed six times (6x) the IESNA LM-80-08 total test duration (in hours) for the device under testing (DUT) i.e. the packaged LED chips.
REMOTE CONTROL INSTRUCTIONS

**Wall Switch Instructions**

- **ON** Turn on, **OFF** Turn off
- Fixture must remain powered through a master switch in order to turn fixtures on/off via wall switch.

- **COLOR (CCT)**
  - 5000K
  - 4000K
  - 3500K
  - 3000K

- **BRIGHTNESS**

* Wall switch enters stand-by mode after 10 seconds. To wake up, press the ON button then resume adjusting the light.

**Remote Control Instructions**

- **ON** Turn on, **OFF** Turn off
- Fixture must remain powered through a master switch in order to turn fixtures on/off via remote.

- **Matching code for light**
  - With light off, press the ID button, turn on light, then release button after the light flashes to finish pairing. Syncing multiple lights to a remote at the same time is possible.

- **Unpair light from remote**
  - With light off, press ID + ▼ together, then release buttons after the light flashes to complete unpairing.

- **Group selecting button**
  - Light must be matched to remote first, with light off, press group selector button for 3 seconds, then turn light on to finish grouping.

- **Save button**
  - Press the "SAVE" for 3-5 seconds until the light turns off. The current brightness and color temperature are automatically saved. When power is restored to fixtures, they will turn on to this setting.

**Handheld Remote Controller**

- **ON** Turn on, **OFF** Turn off

- **Brightness adjustment**
  - Cycles through different color temperatures: 3000K, 3500K, 4000K, and 5000K. When turned off, the light saves current color temperature.

- **Matching Switch to Light**
  - With light off, press ON + OFF buttons simultaneously, turn light on, then release buttons after 2 seconds to finish pairing. Syncing multiple lights to a switch at the same time is possible. If both a wall switch and remote will be used, use the method in the table below.

  - **Brightness adjustment**

- **Fixtures**
  - Must remain powered through a master switch in order to turn fixtures on/off via remote.
